

caIntegrator

The information and links on this page are no longer being updated and are provided for reference purposes only.

Retired

The NCI instance of the caIntegrator database is now retired. For details about the retirement, see the [caIntegrator Retirement Announcement](#).

At a Glance Details

- Version Number and Release Date: 1.4.3 May 2014
- Primary audience: Researchers and bioinformaticians
- Installation Level: Intermediate - technical assistance may be required, download may require supporting infrastructure or software
- System Requirements: Refer to the [System Requirements](#) section.

Tool Overview

caIntegrator is a web-based software application that allows researchers to set up custom web portals to conduct integrative research, with no programming experience required. These portals bring together heterogeneous clinical, microarray and medical imaging data to enrich multidisciplinary research.

Using caIntegrator, researchers can execute, save and share queries to identify and collect many types of data, combining clinical information with genetic and genomic data to enable multidimensional analysis.

caIntegrator uses caGrid analytical services such as GenePattern and BioConductor to perform analysis on the integrated study data, including clinical survival data. caIntegrator leverages the Cancer Data Standards Registry and Repository (caDSR) to map experimental data to well-defined datatypes and uses caGrid and Java client APIs to access data from applications such as caArray and the National Biomedical Imaging Archive (NBIA). caIntegrator is also integrated with caBIO to perform queries on genes and pathways. caIntegrator has visualization capabilities for copyNumber and Expression data. It integrates well with Heatmap viewer and Integrative Genomics Viewer (IGV).

Installation and Downloads

Downloads and Installation Instructions

Version 1.4.3

- [calIntegrator v.1.4.3 Install Zip File](#)
- [calIntegrator v.1.4.3 Upgrade Zip File](#)
- [calIntegrator v.1.4.3 GUI Distribution Jar File](#)
- [calIntegrator 1.4.3 Release Notes](#)
- [calIntegrator 1.4 or 1.4.x Local Installation Guide](#)

Version 1.4.2

- [calIntegrator v1.4.2 Install Zip File](#)
- [calIntegrator v.1.4.2 Upgrade Zip File](#)
- [calIntegrator v.1.4.2 GUI Distribution Jar File](#)
- [calIntegrator 1.4.2 Release Notes](#)
- [calIntegrator 1.4 or 1.4.x Local Installation Guide](#)

Version 1.4

- [calIntegrator v1.4 Release Download](#)
- [calIntegrator 1.4 GUI Distribution Jar File](#)
- [calIntegrator 1.4 Install Zip File](#)
- [calIntegrator 1.4 Release Notes](#)
- [calIntegrator 1.4 or 1.4.x Local Installation Guide](#)

System Requirements

calIntegrator is an open-source, web-based J2EE Java application employing Spring, Struts 2 and Hibernate technologies. Full installation requires installation of JBoss 4.0.5; MySQL 5.0.45; ANT (Apache); JDK 1.5.

Integration with Other Tools - caArray

calIntegrator currently only works with caArray 2.3.x and 2.4.x. Therefore, please make sure that the version of the caArray instance from which calInt2 retrieves data from is 2.3.0 and above.
