

Finalized CTP Anonymization Profile - Basic

This page outlines the contents of the finalized "Basic Profile" template/script which was integrated into CTP as of version X22 to follow a standard method for de-identification of images during submission to NBIA. Generation of this template was based on the guidelines provided by DICOM Working Group 18, [Supplement 142](#). Further information about how to modify CTP Anonymization Scripts can be found at http://mircwiki.rsna.org/index.php?title=The_CTP_DICOM_Anonymizer.
