Init1bes11- Visualization tools for existing models

Pre Interview:

Item	Information/Response
Date:	12/23/2009
Requirement # unique id *<SemCon Ops Initiative>.* *<analysts initials><requirement number>* e.g. Init1dbw1 (eventually linked to Use Cases)	Init1bes11
Originator/Customer's Name:	Denise Warzel
Originator/Customer's Company:	NCI
Summary of requirement pre-interview, by Reviewer:	Business Goal: Develop tools that will help modelers to easily identify reusable components of registered models Actor: Information Technologist (Modelers) Browsing tool(s) that will allow to visualize and navigate the whole model loaded in Knowledge/Model Repository. Unlike textual representations, currently supported by the UML Model Browser, the tool should provide "graphical" representations. This would enhance a potential new users ability to determine if they can use all or parts of a model.
Recommended Next Step Enter one: Follow-up interview, Observe, Use Case Template (text), Use Case Model (formalized/UML diagram), Group Discussion, Prototype, Waiting Room	Waiting room This require.ment overlaps with an existing requirements posted and later detailed by Tejas Dave in an interview (see "Presentation of search results" in response to Q11). Hence, the suggested next step is to wait to leverage(use) the use case that will be developed for the requirement above.
