

LexEVS 6.x Local Runtime PostgreSQL Properties Guide

PostgreSQL Properties - Modifying the postgresql.conf File for PostgreSQL

The following file contains properties controlling the behavior of the PostgreSQL database server:

```
{PostgreSQL_HOME_DIRECTORY}/postgresql.conf
```

Property Name	Description
shared_buffers	Number of shared buffers. Value: 1000.
work_mem	The amount of memory in kilobytes allocated to working memory Value: 51200.
maintenance_work_mem	The amount of memory in kilobytes allocated to maintenance working memory. Value: 512000.
enable_seqscan	We set the 'enable_seqscan' to false to use always use an index versus a table scan.
