2.0 New Features and Updates

This is a minor release, mainly to enable complex properties to be brought into the wiki. A few additional features were added and bugs fixed. Summary follows, for additional details, refer to [Release 1.2.2 task table](#) (login required)

- Workflow: GForge #12780 Add a new status of "Rejected" as part of the Workflow when assignment is rejected.
- Workflow: GForge #12795 Automate the change in status to Accepted when the user adds a Modeler's note.
- Workflow: GForge #12798 Handle complex properties passed from the Wiki to Protege - Note, some complex properties not yet in the wiki data.
- Enumerated Ranges can be defined now - GForge # 8679

To create enumerated range,

- Select Properties tab
- Select Datatype subtab
- Click the icon 'Create datatype property'
- Enter a name in 'For Property' field e.g. test_property
- Select 'string' or any range except 'Any'
- Click the icon '+' (create value)
- Enter allowed values e.g. 'word', 'wordtwo', etc.

3.0 Bugs Fixed Since Last Release

- GForge #12797 Warn user user when switching tabs without saving- has been implemented.
- GForge #12781 Refreshing assignment information when multiple Protege sessions are running
- GForge #10766 Strange display of PT in copy tab - pipe delimited full syns should no longer occur
- GForge #12959 Display proposed concept as existing concept - sporadic problem fixed.

4.0 Known Issues

- GForge #8376 Need Review button in Copy tab - not implemented in this version.
