caArray 019 - caArray File Loading Process

caArray File Loading Process

Topic: caArray Usage

Release: caArray 2.0 and above

Date entered: 04/20/2009

Description of the caArray File Loading Process

There are many types of files that can be uploaded into caArray. We have developed a series of knowledge base entries to explain the different aspects of the file uploading process in caArray. The topics in this series cover:

- caArray 014 - Which files can be uploaded into caArray? *This entry summarizes which files can be uploaded and how to upload them.*

- caArray 016 - Which file can be parsed into caArray? What is the benefit of file parsing? *This entry explains what file parsing means in caArray and which types of the files will be parsed.*

- caArray 017 - What is the meaning of the caArray Status of Importing - Imported versus Imported Not Parsed? *This entry explains why different files are in different states in caArray. It also gives a detailed illustration on how files are processed by caArray and how they end in different states.*

- caArray 018 - What causes the error "Failed Validation"? *Before a file is parsed into caArray, it has to pass caArray's validation process. This entry explains what the file validation process is looking for.*
