

1 - Introduction - calIntegrator 1.4 or 1.4.x Installation

This *calIntegrator v.1.4 or 1.4.x Installation Guide* provides you with the instructions to install and configure a fresh calIntegrator v.1.4 or 1.4.x application. The calIntegrator installation installs and configures a JBoss application server and creates a calIntegrator-specific schema within a pre-existing database on a preinstalled MySQL server.

Directions are given in this document for both Linux and Windows operating systems. This page includes an overview of the installation.

calIntegrator documentation

Published calIntegrator v.1.4 or 1.4.x development documentation can be found on the [calIntegrator page of the NCI wiki](#)

Overview of calIntegrator Installation

The process for installing calIntegrator v.1.4 or 1.4.x includes the following tasks described in this document:

1. Downloading and installing required software
