

JIRA Integration on the NCI Wiki

Integration with JIRA provides these advantages:

- You can log in on either the [NCI Wiki](#) or [Tracker](#) and you will be logged in on both sites.
- If you have editing permissions on the wiki:
 - You can use a shortcut to display any one JIRA issue. Refer to [Using the JIRA Shortcut](#).
 - You can display a list of issues on a wiki page. Refer to [Using the JIRA Macro](#).
 - You can display a chart on a wiki page that shows selected data about JIRA issues. Refer to [Using the JIRA Chart Macro](#).
 - If the default assignee in tracker.nci.nih.gov is configured as “unassigned” in the project, you can use the JIRA macro to create JIRA issues on the NCI Wiki. Refer to [Using the JIRA Macro](#).
- You can add dates for JIRA events, sprints, and releases on a Team Calendar in Confluence. Key point for accessibility: Because a Team Calendar has an image that is invisible and has no alt text, only essential calendars should be embedded in a public wiki page. Refer to the following Atlassian help page:

<https://confluence.atlassian.com/teamcal/add-jira-events-241566244.html> 

Improvements in JIRA integration beginning with Confluence 3.5 are shown in the demonstration provided by Atlassian:

<http://www.atlassian.com/en/software/confluence/whats-new-iframe/35#3.-better-jira-integration>
