

Exporting a Template Group 1.0

You can export a template group you created in AIM Template Builder to use it in an AIM-enabled workstation. Template groups created in AIM Template Builder validate the AIM template schema and are in XML format.

1. Click the **Template Groups** tab.
2. Select the template group you want to export.
3. Below the left panel, click .
4. Click **Export**.
The **Save** dialog box appears.
5. Select a location where you want to save the template group XML file.
